Jessica Paradise

Cloud Support Engineer | AWS Certified Solutions Architect & Developer

Austin, TX · (573) 528-2477 · jessica.paradise@protonmail.com · linkedin.com/in/jessicaparadise · github.com/jessicaparadise · jessicaparadise.com

SUMMARY

Sole engineer at an early-stage AI startup, building and securing its AWS infrastructure. Nine years as an airline and jet captain: diagnosing system failures in real time, working by checklist, and owning the outcome. Completing a B.S. in Computer Science at WGU.

TECHNICAL SKILLS

Cloud (AWS): Lambda, API Gateway, DynamoDB, S3, CloudFront, Route 53, IAM, Secrets Manager, serverless
Operations: Linux, troubleshooting, ITIL 4 incident and change management, runbooks and SOPs
Infrastructure as Code & CI/CD: Terraform, Docker, GitHub Actions
Languages & Databases: Python, Java (Spring Boot), JavaScript, SQL (MySQL), Angular

EXPERIENCE

Early-Stage AI Startup (Stealth) | Software Engineer (part-time) — Austin, TX · 2026 – Present

- Sole engineer on an AI supplier-sourcing product, responsible for its cloud infrastructure, data pipeline, and security.
- Built the supplier data pipeline with Firecrawl, scraping supplier websites and structuring the results for search.
- Migrating the scraper from a local machine to AWS infrastructure.
- Centralizing credentials in AWS Secrets Manager as a single source of truth, with IAM access scoped to least privilege.

Commercial Aviation | Captain & First Officer — 2017 – 2026

JNP Aviation · Air Transport International · Solairus Aviation · Flexjet · Horizon Air

- Sole decision-maker on single-pilot jets, diagnosing and resolving system failures in real time using checklists and standard procedures.
- Flew Boeing 767/757 heavy jets in a two-pilot crew on international cargo and Department of Defense missions, cross-checking each critical action.
- Managed an aircraft maintenance program and flew post-maintenance check flights to verify repairs before returning it to service.

PROJECTS

Serverless Cloud Resume — jessicaparadise.com

- Hosted a static site on S3, served over HTTPS through CloudFront with a Route 53 custom domain.
- Built a visitor counter API with API Gateway, Lambda, and DynamoDB.
- Automated deploys with GitHub Actions: every push to main syncs S3 and invalidates the CloudFront cache.

Vacation Booking REST API — Spring Boot + MySQL

- Built a REST API connecting an Angular front end to a MySQL database, mapping eight JPA entities to an existing schema.
- Wrote a transactional checkout endpoint that saves an order and all its items together, or not at all.
- Diagnosed and fixed Hibernate 7 upgrade failures, including a retired MySQL dialect and a stale-object error on new carts.

Landon Hotel — Containerized Spring Boot + Angular App

- Wrote a multi-stage Dockerfile that builds and runs the full app in a single small container.
- Added multithreading to the Spring Boot back end to serve English and French messages concurrently.

ESP32 IoT Device — PCBWay-Sponsored Hardware Build — *In progress*

- Designing a custom ESP32 PCB in KiCad; earned a PCBWay manufacturing sponsorship for the build.

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate (SAA-C03)
- AWS Certified Developer – Associate (DVA-C02)
- ITIL 4 Foundation
- LPI Linux Essentials
- WGU Micro-Credentials: Java Developer, Back-End Developer
- FAA Airline Transport Pilot (ATP)

EDUCATION

B.S., Computer Science — Western Governors University — Expected Aug 2027
B.S., Aeronautical Science — Green River College — 2019
