Jessica Paradise

Cloud Engineering | AWS Certified (SAA-C03, DVA-C02) | ITIL 4 Foundation

Austin, TX · (573) 528-2477 · jessica.paradise@protonmail.com · linkedin.com/in/jessicaparadise · github.com/jessicaparadise · jessicaparadise.com

SUMMARY

AWS-certified engineer (Solutions Architect and Developer – Associate) seeking a cloud support or junior cloud engineering role. Handles cloud infrastructure and security for an AI supplier-sourcing product and runs a serverless AWS resume site deployed through CI/CD. Brings 10+ years of incident response, runbook discipline, and calm troubleshooting from a prior career in aviation operations. Completing a B.S. in Computer Science at WGU.

TECHNICAL SKILLS

Cloud (AWS): Lambda, API Gateway, DynamoDB, S3, CloudFront, Route 53, Kinesis, IAM (least privilege, OIDC federation), serverless
Operations: Linux, ITIL 4 service management, incident response, runbooks and SOPs, change management
Infrastructure as Code & CI/CD: Terraform, Docker, GitHub Actions
Languages & Databases: Python, Java (Spring Boot), JavaScript, SQL (MySQL), Angular, React Native
Embedded & Hardware: ESP32, KiCad PCB design

EXPERIENCE

Early-Stage AI Startup (Stealth) | Software Engineer (part-time) — Austin, TX · 2026 – Present

- Handle cloud infrastructure and security for an AI supplier-sourcing product being built from the ground up.
- Built the data-collection pipeline with Firecrawl, turning unstructured supplier websites into structured data the product can use.
- Migrating the pipeline from local machines to AWS, so data collection runs on cloud infrastructure instead of a single laptop.
- Secured the platform with least-privilege IAM, secrets management, and protections for collected supplier data.

Commercial Aviation | Captain & First Officer — 2017 – 2026

JNP Aviation · Solairus Aviation · Flexjet · Air Transport International · Horizon Air

- Sole decision-maker on single-pilot jets, diagnosing and resolving system failures in real time using checklists and standard procedures.
- Ran an aircraft maintenance program and post-maintenance check flights, verifying repaired systems met spec before return to service.
- Worked 24/7 high-tempo operations across five operators with strict SOP, checklist, and crew handoff discipline.

PROJECTS

Serverless Cloud Resume — jessicaparadise.com

- Hosted a static resume site on S3 behind CloudFront and Route 53, serving it over HTTPS on a custom domain.
- Added a serverless visitor counter with API Gateway, Lambda, and DynamoDB that updates on every page load.
- Automated deploys with GitHub Actions: every push syncs S3 and clears the CloudFront cache, with no manual steps.

Landon Hotel — Containerized Spring Boot + Angular App

- Added multithreading to the Spring Boot back end so welcome messages load in English and French at the same time.
- Built time-zone conversion and multi-currency pricing into the Angular front end.
- Wrote a multi-stage Dockerfile that builds and runs the full app in one container while keeping the final image small.

Vacation Booking REST API — Spring Boot + MySQL

- Built a REST API linking an Angular front end to a MySQL database, mapping eight JPA entities to an existing schema.
- Wrote a transactional checkout endpoint that validates each order and saves the cart and its items together, so no order is half-saved.
- Fixed Hibernate 7 upgrade failures, including a retired MySQL dialect and a stale-object error on new carts.

Parrot Ice Drones — Spring Boot Inventory App

- Customized a Spring MVC inventory app with Thymeleaf pages, data seeding, and a Buy Now flow that updates stock.
- Built a custom validator that enforces minimum and maximum inventory levels, backed by unit tests.

ESP32 IoT Device — PCBWay-Sponsored Hardware Build — *In progress*

- Designing a custom ESP32 PCB in KiCad; earned a PCBWay manufacturing sponsorship for the build.

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate (SAA-C03)
- AWS Certified Developer – Associate (DVA-C02)
- ITIL 4 Foundation
- Linux Foundations certification
- WGU Micro-Credentials: Java Developer, Back-End Developer
- FAA Airline Transport Pilot (ATP)
- FAA Part 107 Remote Pilot

EDUCATION

B.S., Computer Science — Western Governors University — Expected Aug 2027
B.S., Aeronautical Science — Green River College — 2019
